

Rolls-Royce RB211 Noise Attenuator

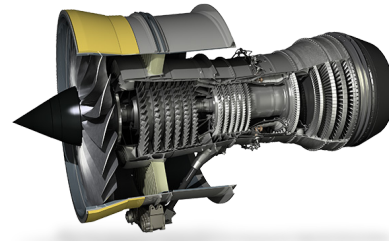

Noise Attenuator for Rolls-Royce RB211-535E4 Series Engine

Since 1990, Aviation Component Services (ACS)* has offered a wide variety of high quality engine aircraft replacement components via FAA-PMA approval (Parts Manufacturer Approval). Our components are manufactured to the highest standards and tested above OEM requirements to ensure greater durability when exposed to harsh environmental factors.

Noise Attenuator

Engines

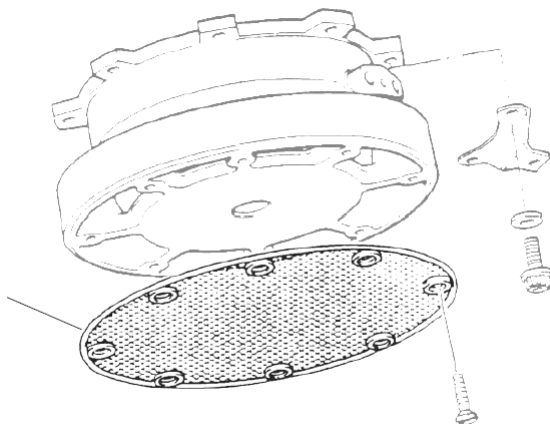

RB211

Applications

Boeing 757-200/300

Pressure Seal IPC/SB
(Located on Air Flow Control-Bleed Valve
Regulator and Actuator)

Noise Attenuator Capabilities

OEM Part Number	ACS Part Number	Description
ED101208	AC69024/ACS-13	ATTENUATOR - ACOUSTIC
