

MD11 Elevator Harness Repair

The MD11 Elevator Harness repairs are RS-DER approved and meet or exceed all OEM specifications and requirements. Herber will deliver a harness that performs the same or better than the original OEM for far less cost and quicker turn around time.

Herber identifies the problem areas and weak points of every harness due to our long standing history of harness repairs and will address those issues on each and every repair. Initial tear down and testing are done to identify all damaged and faulty components. Once diagnosed, repairs will be completed and harness will be returned in “like new” condition with a warranty on all repairs.

Herber Harness Advantages

- Rapid turnaround time
- Substantial savings over purchasing new harness (typically 60% of OEM price)
- Replacements parts comparable or better than OEM
- No BER's under Herber DER specification
- Superior service life — longer repair/ replacement interval

Engineering Highlights

- Terminal ends are crimped or welded to improve in-service life
- Highest quality materials rated the same or better than OEM
- Additional reinforcement at high stress areas
- Corrosion and moisture resistant
- NSF AS9100, FAA & EASA Part 145 repair station & CAAC certified/NADCAP accredited
