

HERBER MANUFACTURED PRODUCTS

Herber Harnesses

Herber Harnesses

In addition to being a distributor of the best products for commercial, military, and general aviation, Herber Aircraft is a manufacturer of leading-edge harnesses. The company is FAA approved to manufacture and overhaul most commercial aircraft engine manufacturers' (Pratt & Whitney, General Electric, and IAE and CFM) EGT harnesses and leads. Our harnesses have approval design based upon test and computation methods per 14 CFR 21.303.

Engineering Excellence

Herber has raised the bar on the engineering of harnesses and leads. Harness features unique to Herber products include:

- Terminal ends that are crimped or welded to improve in-service life;
- Main wire loom is double wrapped with 2200 degree high-temperature insulation;
- Fully adjustable clamping method to assure perfect fit onto the exhaust case, providing faster, easier installation;
- Higher quality harnesses leading to longer wing life compared to OEM products, typically twice as long. The result of these enhancements is increased reliability, quality, and value. And we guarantee the fastest delivery in the industry.

Herber – Your Harness Expert

Herber has specialized in manufacturing and overhauling EGT harnesses and leads for more than 26 years, servicing major domestic and international transport category air fleets. We will continue to focus our peoples' energies on producing harnesses that last longer, and work better, and that enhance your investment in them.

We're proud to offer products with the Herber name.

FAA/EASA-Approved Repair Station

Herber Aircraft Service is an FAA/EASA-approved repair station (GS3R538L/EASA.145.4526). Our repair station personnel are trained, certified and licensed. We have a full complement of Licensed Repairmen and Designated Manufacturing Inspections Representatives (DMIRs) on staff to insure the work is done to the highest standards and all required documentation and certification is provided. Tools and gauges are maintained and calibrated in accordance with ISO100012-1 (superceded MIL-STD-45662A) requirements and provide traceability to the National Institute of Standards and Technology.
