FLUID SYSTEMS

# TEDECO "SEE LEVEL" SIGHT GAUGES

TEDECO "SEE LEVEL" SIGHT GAUGES are designed for direct observation of the actual liquid level. The three available sizes of plastic domes offer the most cost effective solution to your level indicating requirements.

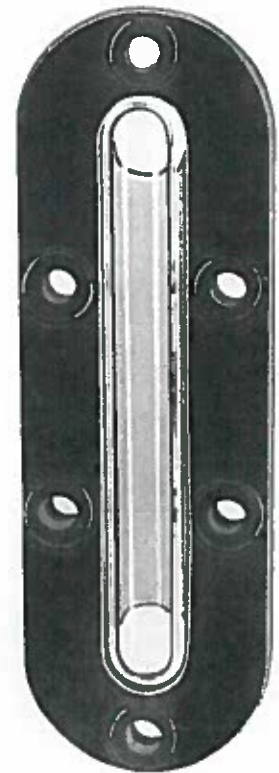

## STANDARD MATERIALS

Housing, Die Cast Aluminum  
Plastic Dome, Acrylic  
Gasket, Buna-N\*  
Reflector, Aluminum Alloy

\*Other Gasket Materials Available

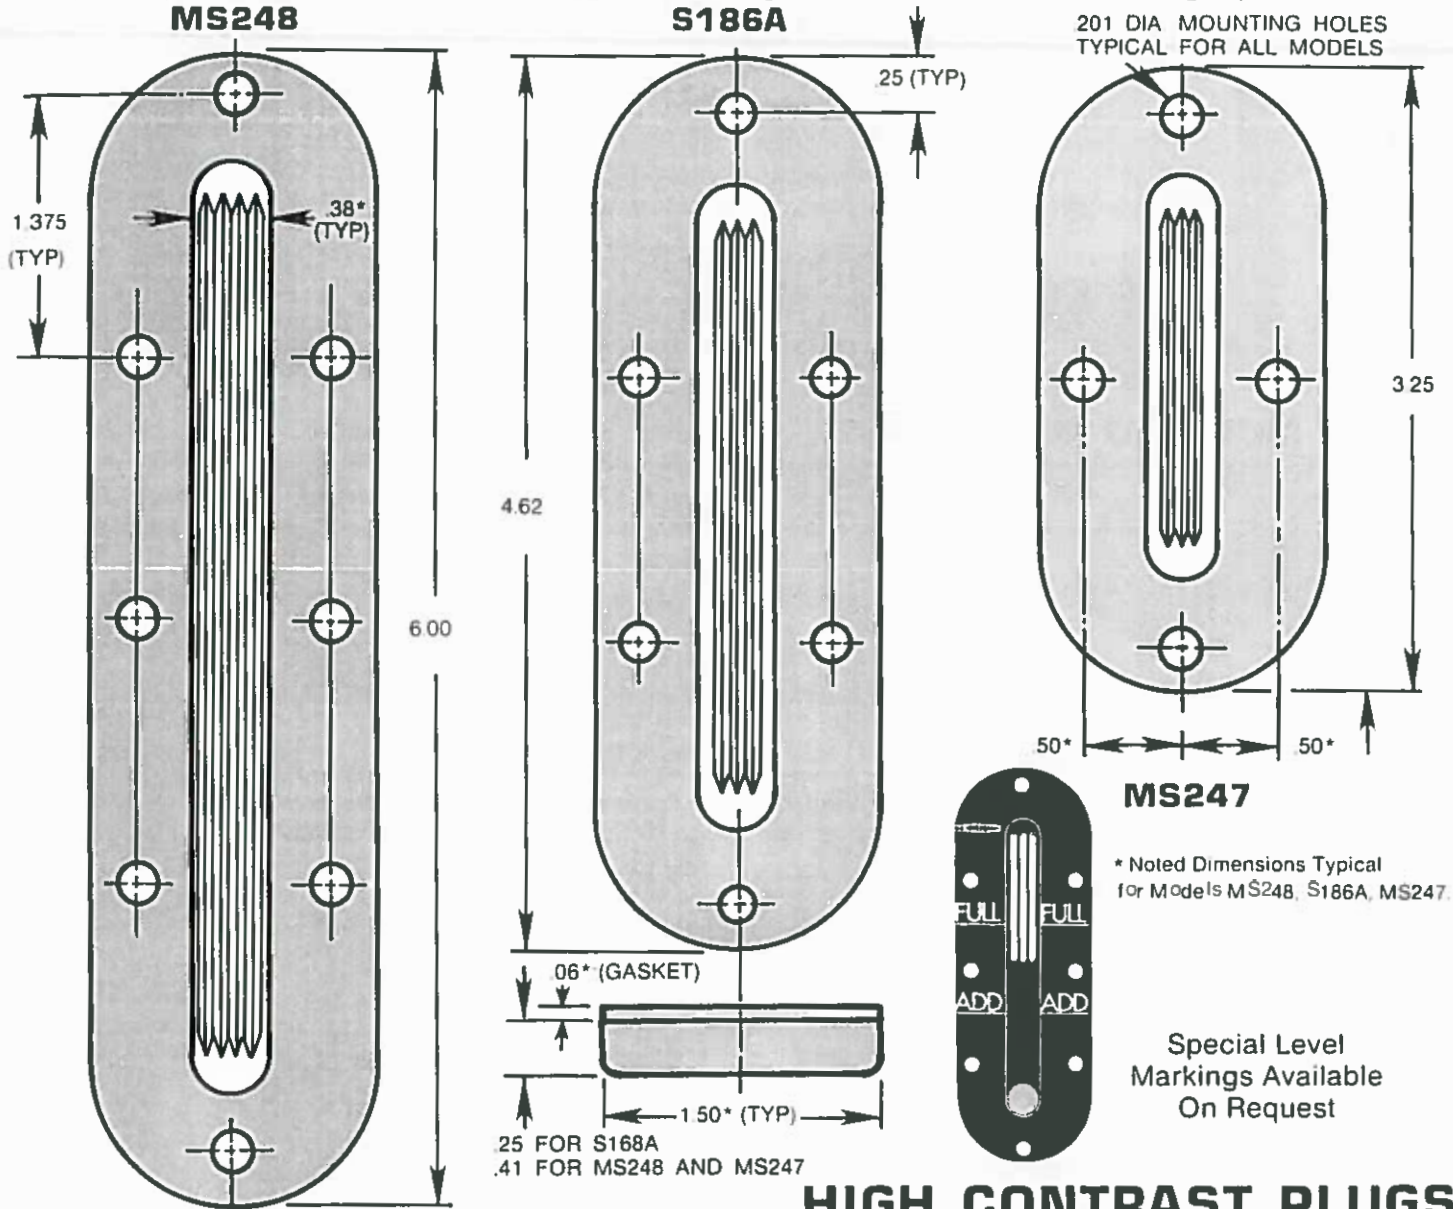

Maximum Temperature 200°F.

Mounting holes should preferably be blind. For thru holes, nylon sealing washers are furnished as standard.

# TEDECO "HIGH CONTRAST" GAUGES

TEDECO "HIGH CONTRAST" liquid level gauges give superior legibility of fluid level, regardless of color or transparency of the liquid. They reflect 90% of incident light, vs. 30-40% of conventional gauges.

## HIGH CONTRAST PLUGS

Pipe thread Oil Eyes use a steel body with corrosion resistant finish. Straight thread models use an aluminum alloy body and are designed to take an O-ring seal.

Materials for the gauges shown include aluminum alloy body, borosilicate lens and gaskets compatible with hydraulic and lubricating fluids at temperatures up to 350° F.

MODEL	THREAD	HEX	MIN BURST PRESS. AT 70° F.
PM 30	3/4-16 UNF	1	890
PM 31	1-14 UNS	1-1/4	1120
PM 32	1-5/8-12 UN	1-7/8	370
PM 49	3/8-18 NPT	3/4	890
PM 36	1/2-14 NPT	7/8	890
PM 35	3/4-14 NPT	1-1/2	612
PM 34	1-11 1/2 NPT	1-3/8	420
PM 128	1 1/4-11 1/2 NPT	1-3/4	370
PM 125	2 11-1/2 NPT	2-1/2	330

\*\*For installation with spanner wrench
